Soylent Posts Estrogen Marketed to Men as Propaganda

tonyodarg.wordpress.com/2020/11/25/soylent-estrogen-propaganda

Tony Odarg November 25, 2020

There is a meme about soyboys floating around the internet for a while. I have always felt the soyboy meme was a dogwhistled version of faggot. I mean, soyboy basically describes a weak, emasculated man. The stereotypical butt pirate comes to mind. That said, there is a quantifiable problem with soy, the female

hormone estrogen and men. Men who drink soy imbibe large amounts of estrogen, which is the female sex hormone equivalent of testosterone. Both genders have each hormone, though in vastly different amounts. Start adding amounts of the opposite-sex hormone and weird shit starts to happen, like the growing of man boobs or weakening of the muscles. The fact that soy companies are not label domestic terrorist groups and banned from selling their products to a population whose men are already overweight and emasculated tells you all you need to know about the worthless nature of our leaders. They want men to never put up a fight or become who they are. None for me, thanks.
